## D.O. PENEDÉS (Alts d'Ancosa)

Lineas atrevidas, integración en el entorno, respeto de los principios bio-climáticos, aprovechar la luminosidad exterior... parecen ser los principios que rigen los diferentes trabajos arquitectónicos.

Integrados en un paisaje, por ejemplo, el edificio de la Bodega de Crianza de las Caves de Mas Rodó, diseñado por el arquitecto Jordi Miralles, que ha sido reconocido como uno de los mejores edificios de España en 2014 por el magazine El País. El edificio está diseñado para ser un espacio de trabajo y de vida, un espacio que se integra en el paisaje y que respeta los principios bio-climáticos, aprovechando la luminosidad exterior y la ventilación natural.

# MAS RODÓ

Vitivinícola

## MAS RODÓ Montonega

A unique variety, autochthonous and recovered

**Montonega** is a white grape, autochthonous and indigenous variety, native from Alt Penedés. As the production of this grape is very low, 4000kg per hectare, in the past, the farmers, being concerned by quantities, decided to remove the plant. Instead, they planted the Parellada, a variety genetically linked with **Montonega**, with 3 times more production. What is very particular in **Montonega** and differentiated the grape from others is that the skin of the **Montonega** has a very particular pink color. Moreover, the grain of this grape is smaller than the Parellada one. These characteristics provide to the **Montonega** a high concentration of sugars and a higher proportion of skin, according to the pulp of the grape. The result is a more complex and full bodied wine, with high minerality and expression. The location of **MAS RODÓ**, at 500 m altitude, allows us to delay the harvest time until the highest maturation of the grape, obtaining a very structured wine, aromatic and dry, with a very well balanced acidity. The result: very particular, different and persistent wine.
